CONERO Wardrobe Lift Usage

Cabinet Settings.

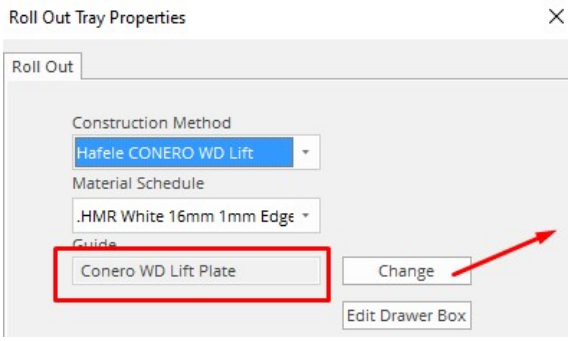

If there are no other Rollout types in the cabinet, you can set the Rollout Construction, and the drawer guide schedule in the cabinet properties:

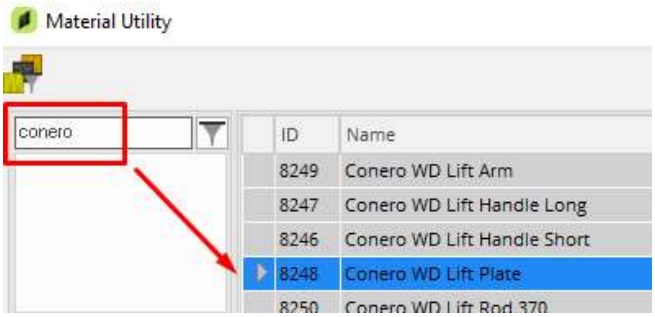

Individual Rollout Settings.

If there are other Rollout types in the cabinet, and you wish to add a CONERO Wardrobe Lift above those for instance, simply add a rollout to the opening you require, and then edit the rollout properties:
In Section Interior view, double click the rollout – or right click and select properties
Set the Rollout to **Hafele CONERO WD Lift** or **Hafele CONERO WD Lift Long** for the long handle option.
For the Drawer Guide, press "Change" and search for CONERO and select the "Conero WD Lift Plate"

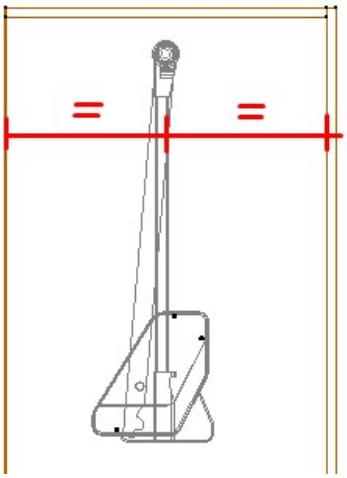

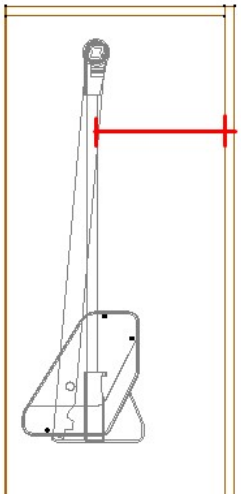

Rollout Space Requirements

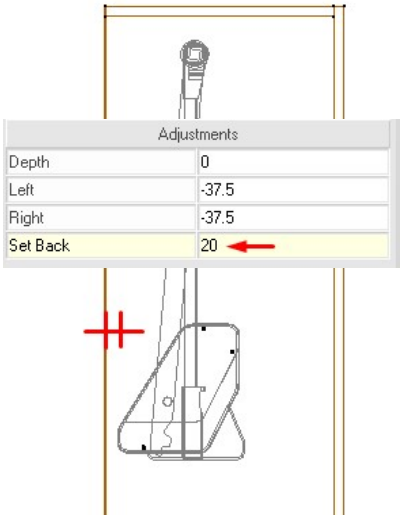

If the following conditions are not met the CONERO Wardrobe Clothes Lift will **NOT** be added!

- **There must be at least 750mm clearance above or the rollout will not be added.**
- **Must be positioned at least 800mm above the floor**
- **Opening must be at least 445mm wide minimum (add 30mm per spacer)**
- **Opening must be no more than 1168mm wide (add 30mm per spacer)**
- **Internal Depth of cabinet must be at least 355mm**
- **(When the Rollout is positioned at its highest point, there will still be a minimum 44mm Gap above.)**

In/Out Position

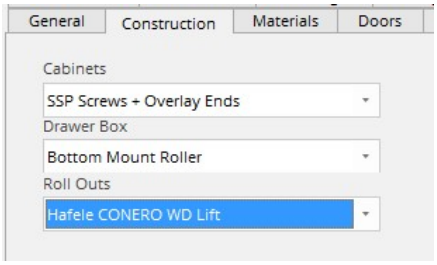

For Internal Cabinet Depths over 450mm the Rail will position in the center of the internal depth.

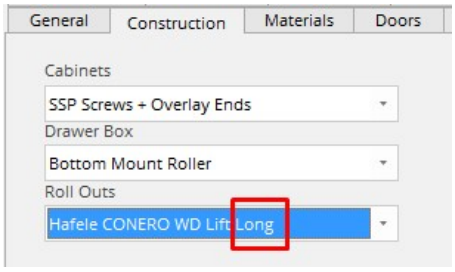

For Internal Cabinet Depths under 450mm the Rail will be positioned 225mm from the back.

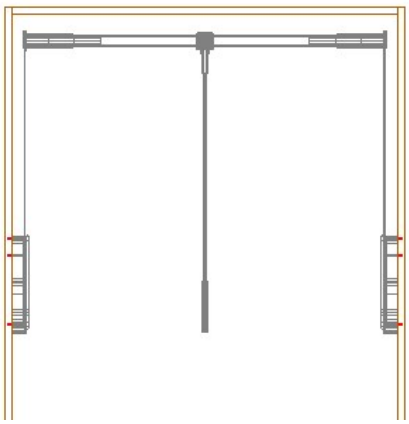

To Change the position, use the "Set Back" value to set the distance back from the face to the Adapter Plate

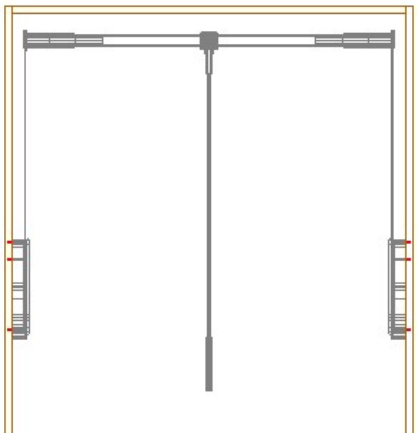

Handle Length

The standard handle is 700mm long – to select the longer 820mm handle choose the “Hafele CONERO WD Lift Long” Rollout:

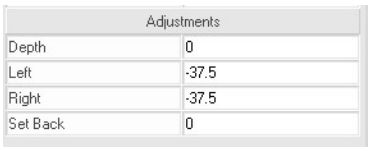

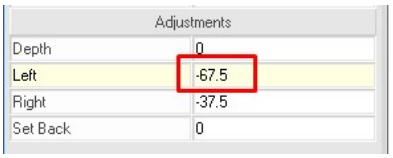

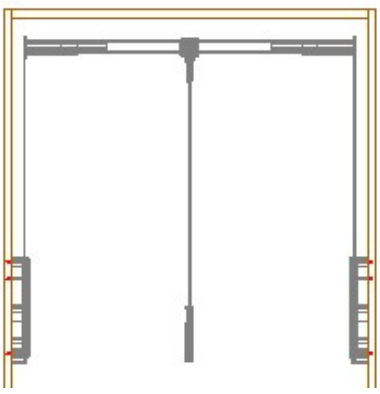

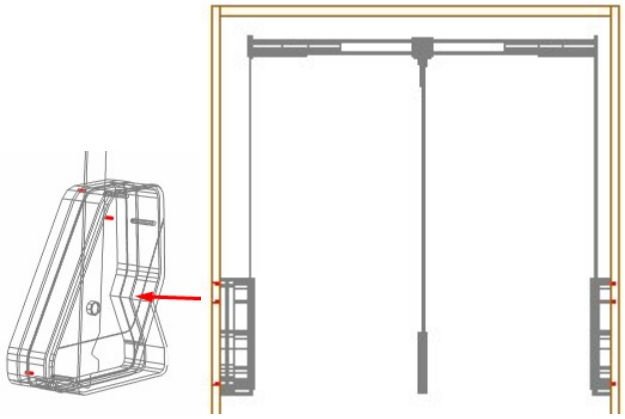

Spacers

To Add Spacer Blocks simply increase the side clearance by 30mm to -67.5mm as shown here:

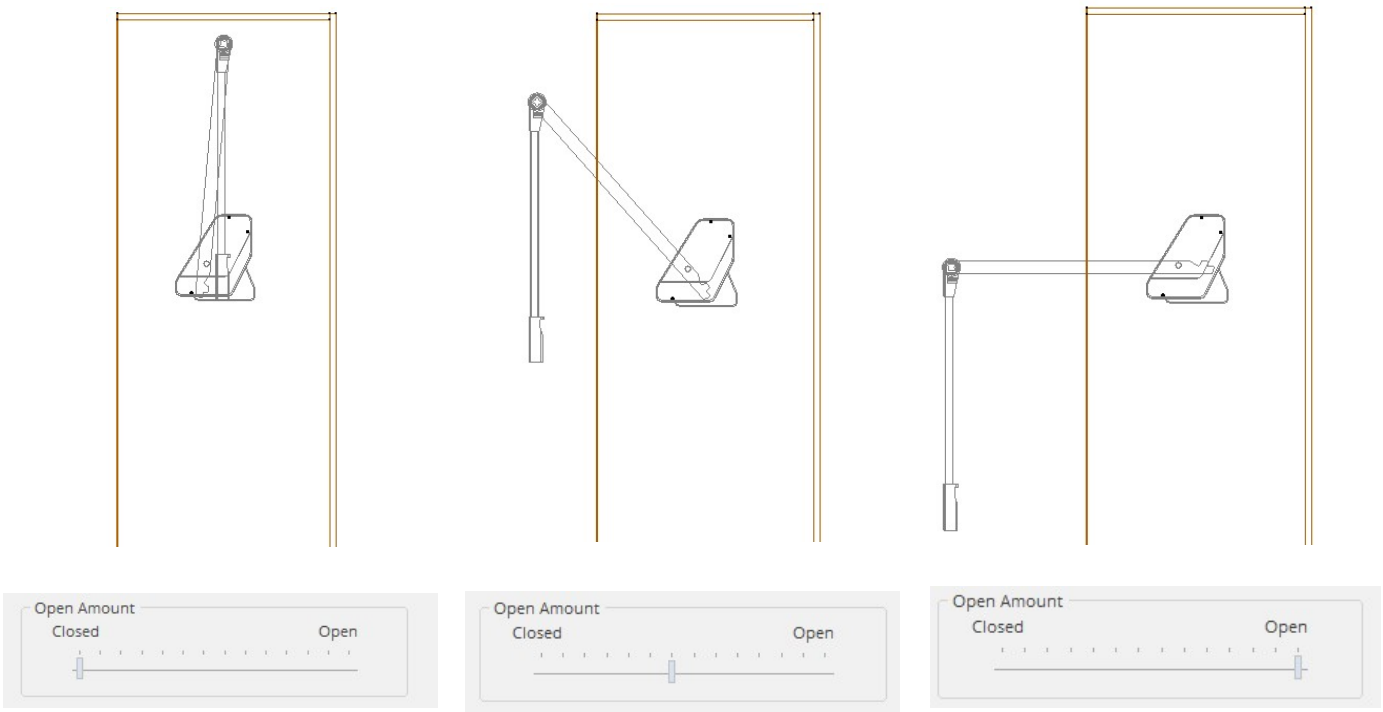

Display in Open Position

To display the CONERO Wardrobe Clothes Lift in the open position simply use the Rollout – Open Amount slider:

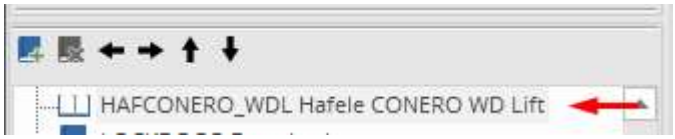

Drilling Setup

Adapter Plate Drilling – Hole sizes

There are material parameters on the "Conero WD Lift Plate" material to set the drilling diameter and depths.

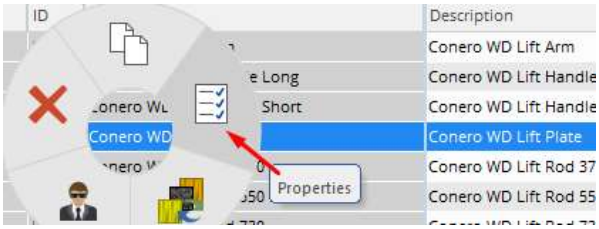

- In the Material Manager, find the **HAFCONERO_WDL Hafele CONERO WD Lift** folder:

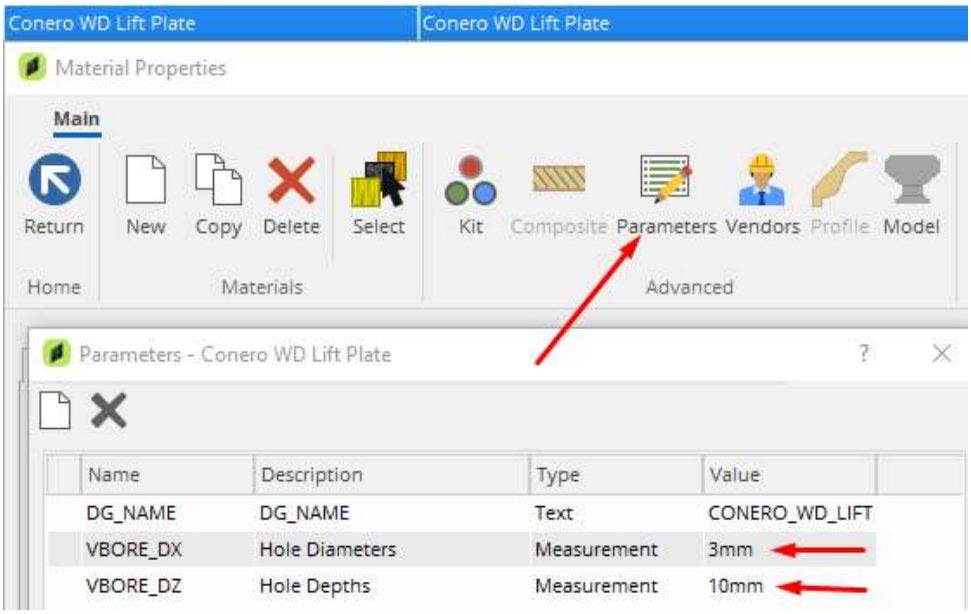

- This folder contains the Conero WD Lift Plate material:

Name	Description
Conero WD Lift Arm	Conero WD Lift Arm
Conero WD Lift Handle Long	Conero WD Lift Handle Long #811.62.990
Conero WD Lift Handle Short	Conero WD Lift Handle Short
Conero WD Lift Plate	Conero WD Lift Plate
Conero WD Lift Rod 370	Conero WD Lift Rod 370

- right-click on it to select its properties.

- In the Properties click the Parameters Menu and change the drill sizes if required:

Tools Required

- The drill diameters you choose in the UCS User Definable Variables above are all required for this package to work. You must have these tool diameters in your tool catalog and in your machine.

Package Exclusions

There may be some items shown in various images contained in this document which are not included in this Package. Any items not specifically mentioned in this guide are part of our other packages which are sold separately.

See our website for more detailed information on these packages.
